Kimseed Modular Hand Screen

Complete Unit

Locating Frame and Base pan

Base Pan

Following the principle of versatile modular screen framing found in the KIMSEED MK3 Seed Cleaner we now offer the KIMSEED Modular Screen Tray System.

Stand alone use. On their own they provide a cost effective cleaning system for smaller amounts of seeds.

Combined with the KIMSEED Seed Cleaner. The hand sieve is a quick and easy method for sizing screens in the Seed Cleaner.

A once only expense. The screen frame is a once only expense and many different screens can be added to increase versatility of the Frame.

Screens slide easily into position within the rectangular tray frame; allowing all current round or slotted perforated screen sizes to be used, thus reducing cost and

Easy, versatile and inexpensive the modular sieve system is a perfect addition to any seed processing enterprise.

Screens easily slide into the tray and lock into position.

Screens available in various sizes in both slotted and round hole formats (45 sizes in stock).
Special sizes cut to order

The Modular Hand Sieve
Can be used along side
the Vacuum Separator.
**A very efficient and
productive pair.**

The cut screens are compatible with the KIMSEED seed cleaner **on the new magnetic frames** so a screen only needs to be purchased once.
