**Kimseed** was established in 1970 by Stephen Hill to service rural land development and to supply seed, equipment, technical expertise and project management throughout Australia, the Middle East and Asia Pacific Rim. Over the past 39 years, Kimseed has offered knowledge and advice to projects in environment, forestry, agriculture and mining as well as exporting equipment and consulting services to over 100 Countries; such as Kuwait, UAE, Libya, China, Saudi Arabia, Sudan, and Iraq.

### Seed Cleaner

The Clipper style Seed Cleaner works with an electromagnetic shaker motor that transmits fine oscillations onto the screens. The screens can be set to different sizes to suit seed being cleaned

### Seed Thresher

The New CW08 Thresher is ideally suited for threshing all kinds of seeds including grains and grasses.

### Vacuum Separator

The vacuum Separator is simple and economical way to clean by aspiration, impurities from seeds. Ideally suited for small seeds and grains, will get cleanliness up to 100 % purity. Ideally suited for quality and quantity testing.

### De Huller

Works extremely well removing the hull of Soy Beans and other hard coated seeds. It has 4 speed settings via multiple pulleys and V Belt driven.

### Seed Scarifier

An extremely versatile unit, the Scarifier is equipped with 4 scarifying double sided discs whose grinding grit can be chosen to suit the seed type.

### Vacuum Harvester

The improved Vacuum Harvester is Self Powered and a highly efficient suction harvester. Ideally suited for bush and shrub seeds harvesting.

### Camel Pitter

The Disc Revegetation Seeder (camel pitter) breaks the hard surface crust, normally found on flat, overgrazed and degraded rangeland or mine site refill sites.

### Hand Sieves

Light weight aluminium and plastic sieve with stainless steel mesh construction. Solid aluminium base pan also available. Can be fitted with mesh from 150 microns up to 15 mm.

*And Many Many More, Please feel free to browse all our equipment range by visiting our web site*
