

KIMSEED AUSTRALIA

Seed Cleaner MK3

Applications:

Our Seed Cleaner Mk3 was designed for research institutes and seed processors to clean a wide range of seeds including cereals, grasses, pulses, legumes, vegetables, flowers, shrubs and trees. The controls are simple and easy to set and adjust, allowing for a precise and efficient clean with 6 outlets.

Features

- The seed is fed from a hopper 18 L (gravity or vibrator) onto constant vibrating pulse motor-controlled screens.
- The 2 magnetic screen frames 380mm x 247mm are easily positioned using silicon slides
- 30 plus screen sizes, allows for a variety of seed types to be processed.
- Seed is cleaned from the dust and chaff particles by using the screens and fan.
- Quick cleaning of the machine between samples by turning the shaker to maximum.
- Careful design has ensured there are no seed traps.

Speed control

- Screen vibration and Fan speed are easily set by turning the controls.
- Continuous adjustment is precise and quick.

Safety

- Quiet operation.

Dimensions

Length: 1155 mm
Width: 485 mm
Stand Width: 810 mm
Total Height: 1530 mm
Stand Height :680 mm
Machine Weight: 57 kg

Power

240VAC 50hz Single Phase 2A

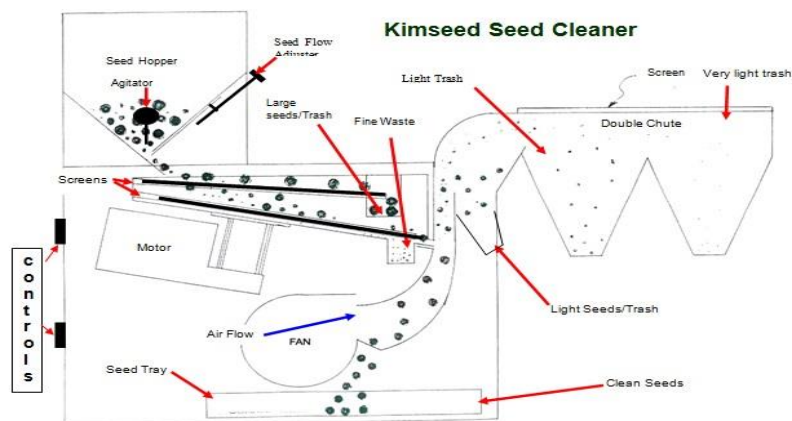

Shaker Speed

Continuously variable hz

Cleaning Capacity:

Up to 150 kg per hour depending on seed type.
